

instructions

Fill jar ½ full, using at least one cup warm water. Add one or two drops of dish soap. Open lure packet and attach lure under the lid. Use double-face tape as shown. Wash hands and any spills with soapy water. Tie knot in one end of hanger. Slide other end through hole in the lid. Place lid on trap and hang trap securely. When the trap becomes full, empty and wash out the trap. The lure works one full season and can be reused each time trap is cleaned.

DO NOT TOUCH LURE - USE GLOVES OR TWEEZERS TO HANDLE LURE.

Lure is very powerful. You will attract moths if you handle the lure.

Do not allow the trap to dry up, add more water if needed.
