**SAFE ~ EFFECTIVE ~ NON - TOXIC**

# About Us

## Facts:

- Made in USA**
- All Natural sprays**
- Patented & Proprietary**
- All products scientifically tested**
- Certified Green - no poisons**

SpringStar was founded to develop poison-free pest control products, using natural compounds, insect pheromones, attractants, and biotechnology techniques. Our products are effective, non-toxic, and environmentally safe. Our philosophy is to avoid creating pollution and preserve the environment. While other organizations are satisfied simply banning or outlawing pesticides, the SpringStar scientific team is dedicated to developing products that give customers viable alternatives to chemical poisons. Now you can stop using toxic materials and still have effective pest control.

We have developed a complete line of products for your home and garden. Our products provide alternatives to traditional chemical pest control methods by combining highly-effective insect attractants with easy-to-use jars, adhesive traps, and our new line of sprays. Every one of our products is designed to be EARTH FRIENDLY by acting as an efficient substitute for harmful pesticides. SpringStar has also reduced the amount of plastic and paper used in our products, but still guarantees that they work exceedingly well. The products we produce are made to be easily recyclable or compostable to contribute to keeping the planet green and healthy.

SpringStar is a family business and we value working hard as well as enjoying life, family, and friends. We operate our research offices from a wooded 8-acre farm on the outskirts of Seattle, WA. Our manufacturing plant is in nearby Woodinville, WA. The company is geared to grow at a rapid pace, while maintaining high quality standards and on-time fulfillment.

# Yellowjacket Traps

**Yellowjacket Trap Jumbo**  
Item No. YJT12  
Includes 1 Lure

**Yellowjacket Trap Slim**  
Item No. SYJ24  
Includes 1 Lure

**Glass Yellowjacket Trap**  
Item No. GWT6  
Includes 1 Lure

**Yellowjacket Trap Slim Promo**  
Item No. SYJPRO5  
Mini-Pallet

The OakStump Farms Yellowjacket & Wasp Traps safely and efficiently catch yellowjackets and other wasps by baiting and capturing them in a special yellow translucent trap. This trap is more effective because it lets a few insects escape and return to the nest. They then revisit the trap, bringing more yellowjackets with them right into the trap! OakStump Farms Yellowjacket Traps are reusable, non-toxic, safe for the environment and have been proven to catch more wasps than all other brands!

## Replacement Lure

**Yellowjacket & Wasp Lure**  
Item No. S1533  
Contains 2 Lures

Our Yellowjacket and Wasp Lures are extremely effective for many types of Yellowjackets and the naturally-based bait works in all other brands of traps. Lures last up to 14 days in normal conditions.

# Indoor Solutions

## Aphid and Whitefly Trap Item No. S1501

Monitor and control small flying insects such as aphids, whiteflies, thrips, fungus gnats, scale insects and other pests in gardens, homes & greenhouses. The special yellow color attracts the insects to the trap - the powerful glue kills them. The glue is vegetable-based, not petroleum-based like other brands and we use a paper backing, making the whole trap compostable when full of insects.

Units per Pack: 4

## Pantry Moth Trap Item No. S202

Package of 2 pre-assembled non-toxic traps captures the moths in your home that contaminate flour, food, birdseed, and pet food. Lure attracts flour moths, meal moths, seed moths and most other food moths. Each trap will work up to three months under normal conditions. Traps are disposable and extremely effective. Completely safe around food products and pets.

Units per Pack: 2

## Birdseed Moth Trap Item No. S204

Non-toxic traps captures the moths in your home that contaminate birdseed. Lure attracts flour moths, meal moths, seed moths and most other food moths. Traps are effective for up to three months under normal conditions. Traps are disposable. Completely safe around food products and pets. Two traps cover up to a 2000 square foot home.

Units per Pack: 2

## Kitchen Fruit Fly Trap Item No. S415

Retail package of two decorative traps designed to discreetly capture the fruit flies that contaminate fruits & vegetables in your home. Lure gives off a mild, pleasant, fruity odor that attracts fruit flies into the disposable jar where they become trapped and drown. Lures are effective for 2 weeks under normal conditions. Completely safe for use around food products. Units per Pack: 2

## Gnat Stix Item No. S5333

The single most effective treatment for fungus gnats in house plants! Simple, easy to use sticky traps kill adult flies for months as they emerge from the soil. The insects are attracted to the special yellow sticky which imitates a leaf. Controls even the worst infestations without toxic pesticides. Use one Gnat Stix for each infested plant and for all other plants in the same room and nearby rooms.

Units per Pack: 12

## Spider and Silverfish Trap Item No. S206

Package of 6 easy and safe-to-use, non-toxic Spider and Silverfish Traps can be used for almost any predator type of spider found roaming in homes, including hobo spiders, domestic house spiders, wolf spiders, brown recluse spiders, parson spiders, sac spiders and more. Also useful for scorpions and large spiders. Each extra-large baited sticky trap will last up to three months under normal conditions. They imitate spider hiding places and are effective when placed along the baseboard of walls.

Units per Pack: 6

## New Flour & Pantry Moth Trap Item No. S203

Simple, non-toxic traps captures the moths in your home that are contaminating flour, food, birdseed, and pet food. Lure attracts flour moths, meal moths, seed moths and most other food moths. Each trap will work up to three months under normal conditions. Traps are disposable and extremely effective. Completely safe around food products and pets.

Units per Pack: 2

## Clothes Moth Trap Item No. S1524

The clothes moth trap attracts and captures adult male webbing clothes moths. Moths are attracted to the trap by a long-lasting pheromone lure, where they are killed on a non-toxic sticky pad. Clothes moths are very difficult to find and identify -- the clothes moth trap simply and easily captures moths, assuring that infestations can be stopped before expensive damage to clothes occurs.

Units per Pack: 2

## Window Fly Trap Item No. S534

Flies, especially cluster flies, are naturally attracted to windows in homes. The flies reach a sticky end on the Window Fly Traps. The trap is easy to handle and stays sticky weeks longer than old fly ribbons. Attractive pattern hides insects as they are caught on the trap. Effective against house flies, cluster flies, garbage flies and blow flies. Removes cleanly and easily from window when full of flies.

Units per Pack: 4

## Cockroach Trap Item No. S1303

Package of 6 extra-large sticky, non-toxic cockroach traps. Our traps use a powerful natural attractant to lure roaches onto a sticky glue surface. Traps should be placed along base boards, under sinks, and near water pipes in warm, dark areas near a food supply. All traps are disposable and will last up to 3 months.

Units per Pack: 6

**Insect Magnum**  
Item No. S1306

Eliminates cockroaches, palmetto bugs, spiders, silverfish, ants, scorpions, crickets & centipedes. Extra large, professional-grade traps last for months - bait included. Cost per trap is lower than other types of traps.  
Units per Pack: 6

**Glass Pantry Moth Trap**  
Item No. GPMT1

New attractive Glass Trap looks great hanging by a window or sitting on a counter. Simple and easy to use, add soapy water, set the trap on a counter, then let the powerful pheromone lure draw moths to the bottom of the trap where they can't escape. When the trap fills up, rinse it out and add soapy water. Replace the bait every 3 months. The trap includes a lure which is effective for up to 90 days. Use 1 trap per 1,000 sq. feet.  
Units per Pack: 1

**Flour Moth Trap**  
Item No. S20

This popular trap ships & displays flat; simple assembly. The environmentally-friendly design has no waste! Outlasts and out-catches other brands. Preferred by catalogs or to save shelf space. A top seller for bird fanciers and pet stores. Catches pantry moths, bird seed moths, Indian meal moth and other moths found in stored foods, seeds, and feed.  
Units per Pack: 2

**Pantry Moth Lure**  
Item No. S1544  
Units per Pack: 2

**Glass Fruit Fly Trap**  
Item No. GFFT1

A gorgeous solution for pesky fruit flies in homes. Includes our natural-based lure that outperforms other types of baits such as red wine vinegar. The attractive glass jar is 5 inches tall and looks great hanging by a window or sitting on a counter. Fruit flies enter the bottom of the trap and are caught. Simply add lure packet to water, add a drop of dishwashing soap, then set trap. Lure solution is effective for 10 to 14 days, or until the trap is full of fruit flies.  
Units per Pack: 1

**Flea Trap**  
Item No. S102

Control even the worst flea infestations! A safe and simple permanent appliance that uses heat & light to draw fleas from up to 25 feet away. Fleas fall through the grid and meet a sticky pad on the replaceable capture pad. Trap catches 4 to 6 times more fleas than older style traps. Adult fleas are killed by the thousands. Works year round without poisons, expensive pills & visits to the vet. Capture pads last for 3 months or until filled with up to 10,000 fleas.  
Units per Pack: 1

**Fruit Fly Lure**  
Item No. S1530  
Units per Pack: 3

**Flea Trap Capture Pads**  
Item No. S103  
Units per pack: 3

**5 SKU Combo Shelf**

**Biocare Combo**  
Item No. SK45COMBO

**Spider Trap Sidekick**  
Item No. SK45S206

**Kitchen Fruit Fly Sidekick**  
Item No. SK45S415

# Outdoor Solutions

## Aphid Chaser Item No. S512

Ward off pest aphids on roses with a natural pheromone that alarms aphids, causes them to stop feeding and eventually move on or die of starvation. Non-toxic dispensers do not affect beneficial insects and controls common aphids, especially green peach aphid, often found on roses. One dispenser hung on each infested rose plant wards off aphids in 2 to 4 days. Dispenser work for 3 to 4 weeks. Units per Pack: 8

## Codling Moth Trap Item No. S1506

Codling moths are worldwide pests that damage the fruits of apple, pear and quince during the insect's worm stage. Controlling the moths during these key flight times, before the eggs are laid, can effectively prevent worm damage to fruit. The Codling Moth Trap pinpoints these flight times by capturing the male moths which fly at the same time as the female moths. Units per Pack 2

## Earwig Trap Item No. S522

Simple, non-toxic traps bring earwigs under control in homes, gardens and orchards. High-strength plastic traps catches earwigs that crawl into the holes of the trap. Traps can be discretely placed to catch earwigs, even in wet areas. Just add a simple food bait like fish oil or vanilla. Safe for use around gardens. Units per Pack: 4

## Lady Bug Lures Item No. S702

Our Lady Bug Lure acts like a magnet that draws lady bugs, lacewings and other beneficial insects to gardens to devour pests such as aphids, plant lice, and scale insects. Use one lure for each square yard of infested plants, or one lure for each rose bush or shrub. Effective natural control starts immediately and control is seen within one week. Units per Pack: 4

## Apple Maggot Trap Item No. S510

The SpringStar Apple Maggot trap and lure set are proven effective at reducing apple maggot damage. Flies are attracted by the lures and come to a sticky demise on the juicy-looking apple sphere. The plastic reusable trap includes our one-season, controlled-release lure system. Place traps in trees 1 or 2 weeks before bud break in early spring, and leave out until harvest time. Units per Pack 3

## Apple Maggot Lure Item No. S508

Units per Pack: 3

## Slug Trap Item No. SLT24

The OakStump Farms Slug Trap uses a powdered vegetable extract bait formula that mixes with water to create an effective, long-lasting lure. Slugs are drawn into our unique, patented trap where they are captured and drown in the liquid. The traps are re-useable, non-toxic, and safe for the environment. The bait is effective for up to 3 weeks. Case of 24 traps are shipped pre-packaged in an attractive shelf display. Slug Lures are non-toxic and safe for the environment and will not harm plants or animals. Designed to be used in conjunction with OakStump Farms Slug Trap. Units per Pack: 1

Slug Trap Shelf Display

Units per Pack: 4

**Fly Trap Slim**  
Item No. FT24  
**Fly Trap Jumbo**  
Item No. FLY12

Flies are a bother. They always seem to pay a visit when you least want them around. We can't think of anything redeeming about them, and getting rid of them can be difficult. That's why we developed the OakStump Farms Fly Trap. It's easy to use and puts flies where they belong - out of your living space and in prison with other dead flies! Available as a handy 32 oz trap, or our Jumbo 64 oz trap for farm or kennel. Units per Pack: 1

**Fly Lure**  
Item No. S1516  
Units per Pack: 4

**Gypsy Moth Trap Slim**  
Item No. GM24  
**Gypsy Moth Trap Jumbo**  
Item No. GM12

Gypsy Moths are one of the most destructive pests, stripping 100's of trees and shrubs. We created the OakStump Gypsy Moth Trap to help the public avoid applying pesticides indiscriminately to control Gypsy Moths. It is simple, easy to use and utilizes powerful pheromone lures to attract Gypsy Moths and detect outbreaks, so you can use less pesticides. Comes as a gallon Jumbo or a streamline version. Both sizes includes one season-long Gypsy Moth Lure. Units per Pack: 1

**Gypsy Moth Lure**  
Item No. GML12  
Units per Pack: 1

**Fly Trap Mini Pallet**

Item No. GM24

**Gypsy Moth Shelf Display**  
Item No. GMSD12X12

**Japanese Beetle Mini Pallet**  
Item No. JB24

**Japanese Beetle Trap**  
Item No. JB6  
**Japanese Beetle Lure**  
Item No. JBL12  
Units per Pack: 1

The Oak Stump Farms Japanese Beetle Trap and the Japanese Beetle dual lure system draws male and female Japanese beetles away from valuable ornamentals, fruit trees, vegetables, flowers and shrubs. Our sturdy all-plastic design does not need replacement plastic bags; just rinse and reuse the collection jar. There are no toxic agents to damage the environment and the trap does not attract animals, birds or beneficial insects. The Oak Stump Japanese Beetle Lure can also be used with any other brand of Japanese Beetle Traps. The unique controlled-release system lasts for the entire trapping season. Units per Pack: 1

# Mosquito Solutions

## Mosquito Trap Item No. MOS12

Mosquitoes are known to transmit diseases such as equine encephalitis, West Nile virus and others. After biting an animal or bird infected with a disease, they lay eggs and come back to bite again. It is this second bite that transmits diseases. The OakStump Mosquito Trap attracts, catches and kills mosquitoes when they try to lay eggs, thus preventing that second "fatal" bite.

Our trap uses a mosquito egg pheromone which mosquitoes use to mark special egg-laying places. This "locator" biochemical draws mosquitoes into the trap, but they cannot find the exit and will eventually tire and drown in the liquid. Traps are re-usable, non-toxic, and safe for the environment. This trap was featured on HGTV! Lure system is effective for 5 to 6 weeks.  
Units per Pack: 1

## Mosquito Lure Item No. S1519 Units per Pack: 1

Mosquito Science Mosquito Killer - Naturally-based, safe, biodegradable mosquito killer, safe for use around homes and farms. Does not harm pets, fish or livestock. Dual action - kills mosquito larva in water and repels adult mosquitoes for up to 4 weeks. Effective control that bio-degrades without persistent toxic chemicals, bacterial toxins or insect hormones.  
Units per Pack: 30 oz. size

# Non-Toxic Pest Control

## Aphid Chaser

Treatment for common aphids!

## Flea Trap

Poison-free flea control!

<b>Aphid &amp; Whiteflies</b>		Aphids, whiteflies, fungus gnats, scale insects, thrips, and other small flying pests attack plants in homes and greenhouses. They are all attracted to the bright yellow color of our trap.	<b>Aphid &amp; Whitefly Trap</b>
<b>Codling Moths</b>		Codling moths are the worm in the apple that destroys apples and pears worldwide. Moths emerge in cycles (3 to 5 cycles per year) and they are attracted to sex pheromones. This simple trap monitors cycles for best moth control.	<b>Codling Moth Trap</b>
<b>Fleas</b>		Small biting insects that live on pets and breed in carpets and will bite people and irritate pets. Larva lives in carpets and new adults can be eliminated with the lighted flea trap. A durable and permanent appliance.	<b>Flea Trap</b>
<b>Flour Moth Pantry Moth</b>		Pantry moths, seed moths, flour moths, and related moths feed on birdseed, pet foods, chocolate, and other foods. White worms are found in foods or crawling on walls. These simple disposable traps are safe for use around food.	<b>Flour &amp; Pantry Moth Trap</b>
<b>Fruit Flies</b>		Fruit flies breed in overripe fruit, garbage and compost piles and become a seasonal annoyance in the kitchen. They are attracted to bright yellow and ripe fruits. Our specially-formulated pheromone bait out-catches red wine vinegar and other home-made remedies.	<b>Kitchen Fruit Fly Trap</b>
<b>Fungus Gnats</b>		Fungus gnats are small black annoying flies that emerge from the soil and are attracted to bright yellow. These traps last for months to control pesky fungus gnats.	<b>Gnat Stix</b>
<b>Clothes Moths</b>		Clothes moths destroy woollens and other natural fabrics. They are easily detected with this simple trap, so that action can be taken before harmful and expensive damage occurs. Traps last for months and can be composted when full.	<b>Clothes Moth Trap</b>
<b>Spiders &amp; Silverfish</b>		Predator type spiders create an annoyance in homes. Their natural ability to run and seek food makes them easy to catch in properly placed sticky traps. Hobo spiders, brown recluse and others that inflict painful bites can be caught with these simple, extra-large traps. Also great for silverfish, scorpions and centipedes.	<b>Spider &amp; Silverfish Trap</b>
<b>Apple Maggots</b>		Apple maggot flies lay their eggs in apples throughout the season. Infested fruit is ruined by being riddled with holes and maggots. Flies are controlled by being attracted to the lure and trapped on a reusable sticky apple shape sphere.	<b>Apple Maggot Trap</b>
<b>Aphids in Gardens</b>		The lady bug lure uses a natural pheromone to attract lady bugs and other species to your garden to eat damaging insects like aphids and plant lice.	<b>Lady bug Lure</b>

<b>Aphids</b>		Aphids, whiteflies, fungus gnats, scale insects, thrips, and other small flying pests attack plants in homes and greenhouses. They are all attracted to the bright yellow trap and die.	<b>Aphid Chaser</b>
<b>Earwigs</b>		Earwigs hatch in spring and they feed on other insects, plants, ripe fruits, and garbage. Earwigs damage fresh fruit, seedlings, soft fruits and the petals and pollen of many plants. Earwigs are attracted to the traps and then drown in the water.	<b>Earwig Trap</b>
<b>Fruit Flies</b>		Fruit flies are common in houses, restaurants, grocery stores, and wherever food is allowed to rot and ferment. Fruit flies are especially attracted to ripened fruits and vegetables in the kitchen. Our beautiful glass trap is effective and discrete.	<b>Glass Fruit Fly Trap</b>
<b>Indoor Flies</b>		Flies of all types are attracted and killed on these simple, effective traps. These easy to use traps out-catch and out-last old fly ribbons.	<b>Window Fly Trap</b>
<b>Outdoor Flies</b>		Flies are a bother to everyone and all we want them to do is fly away. They are attracted to the bait in our easy-to-use trap and killed quickly and easily without using toxic chemicals.	<b>Fly Trap</b>
<b>Gypsy Moths</b>		Gypsy moth egg masses are typically laid on branches and trunks of trees, but egg masses may be found in any sheltered locations. Use our Gypsy moth trap to get rid of gypsy moths quickly and easily.	<b>Gypsy Moth Trap</b>
<b>Japanese Beetles</b>		The life cycle of the beetle is typically one year in most parts of the United States, but this can be extended in cooler climates. During the larval stage, the Japanese beetle lives in lawns and other grasslands, where it eats the roots of grass.	<b>Japanese Beetle Trap</b>
<b>Mosquitoes</b>		Mosquitoes go through four stages in their life cycle: egg, larva, pupa, and adult or imago. The adult females lay their eggs in water, which can be a salt-marsh, a lake, a puddle, a natural reservoir on a plant, or an artificial water container such as a plastic bucket. This simple trap captures female mosquitoes when they try to lay eggs. As seen on HGTV!	<b>Mosquito Trap</b>
<b>Slugs</b>		Slugs are quite a bother to your garden. Granular baits have to be applied every week to keep them under control. The slug trap works for weeks and just has to be emptied and rebaited. No toxic materials are used.	<b>Slug Trap</b>
<b>Yellow Jackets</b>		Yellowjackets and wasps are a real nuisance. Our trap is safe, effective, and easy to set up. Your summer barbecues and picnics will be yellowjacket and wasp free, making your life a lot easier. Rated the number one trap, and our bait works in any brand of trap.	<b>Yellowjacket &amp; Wasp Trap</b>

# ★ SpringStar Inc

We continue to meet and exceed the high standards of the Green Industry. Do-it-yourself pest control allows you to control your direct living conditions.

Our full product line is pesticide-free, environmentally safe and effective.
